

S A SANUSH

Thiruvananthapuram, Kerala • +91 90745 85562 • sasanush86@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

EXECUTIVE SUMMARY

Front-end developer and MCA student skilled in React.js, Three.js, and Flask, with hands-on experience across two technical internships in Python and modern web development. Led end-to-end development of a full-stack NLP-powered resume screening system. Focused on building interactive, high-performance web applications with strong UI/UX sensibility — well-suited for roles requiring both front-end precision and back-end integration.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Python
- **Front-End:** HTML5, CSS3, React.js, Bootstrap, Tailwind CSS, Three.js
- **Back-End & Data:** Flask, NumPy, Pandas, Matplotlib
- **Databases:** SQLite3, MySQL
- **Tools & Software:** Git, GitHub, Figma
- **AI/NLP Technologies:** spaCy, Tesseract OCR, Poppler

SOFT SKILLS

- **Communication & Teamwork** — led a team of 4 on a full-stack project
- **Problem Solving** — debugged cross-browser issues, NLP pipeline design
- **Time Management** — managed internship deliverables alongside academics
- **Adaptability** — transitioned across Python data work and front-end development
- **Attention to Detail** — pixel-accurate UI implementation and ATS criteria scoring

PROFESSIONAL EXPERIENCE

ICT Academy of Kerala

2026

Role: Advanced Python Intern

- Built data visualisation dashboards using Matplotlib to represent insights from large datasets
- Processed and cleaned datasets of 5,000+ records using NumPy and Pandas
- Developed lightweight REST APIs using Flask to expose data through HTTP endpoints
- Managed relational databases using SQLite3 — schema design, queries, and data retrieval
- Executed end-to-end project workflows from raw data ingestion to visual output, documenting code and pipelines for handoff and reproducibility
- **Impact:** Delivered 3+ fully functional data visualisation dashboards, streamlining data processing workflows and reducing manual effort in analysis tasks

Unified Mentor

2024

Role: Front-End Development Intern

- Developed and deployed responsive web interfaces across 10+ pages using HTML5, CSS3, and JavaScript
- Translated design mockups into pixel-accurate, browser-compatible web pages
- Ensured cross-browser compatibility across Chrome, Firefox, and Edge
- Collaborated with team members on real-world client projects, improving UI consistency by enforcing design standards
- Assisted in QA testing and resolving UI bugs reported by clients
- **Impact:** Delivered 10+ responsive web pages meeting client design specifications, improving overall page engagement across the project

PROJECTS

Talent Acquisition System (TAS) — *Project Lead*

- Led a team of 4 to build a full-stack, Flask-based resume screening platform that parses PDF/DOCX resumes and scores candidates against job descriptions using NLP and keyword matching
- Implemented text extraction and skill-matching pipeline with spaCy, Tesseract OCR, and Poppler to automate ATS-style candidate screening
- Built data processing and visualisation layers with NumPy, Pandas, and Matplotlib, backed by a SQLite3 database for structured candidate data
- Developed the front-end UI with HTML, CSS, and JavaScript, coordinating with teammates across backend, data, and UI workstreams

DayTone – Mood Analyser

- Built a Flask-based AI mental wellness web app that lets users log daily moods, analyse sentiment, and visualise emotional trends over time
- Applied machine learning techniques to predict burnout risk from logged mood and sentiment data, with interactive charts to help users track emotional patterns

J.A.R.V.I.S. — AI Desktop Assistant

- Built a cross-platform AI desktop assistant for Windows and Linux in Python, with voice control and wake-word detection
- Engineered an auto-fallback system across 9 AI providers (Ollama, Claude, GPT-4o, Groq, and more) for uninterrupted responses, handling speech recognition, provider routing, and PC control

Personal Portfolio Website

- Built a personal portfolio website with HTML, CSS, JavaScript, and Three.js featuring 3D visuals, smooth animations, and an AI-powered chatbot assistant for visitors

EDUCATION

Lourdes Matha College of Science and Technology **Aug 2025 – Jun 2027 (Pursuing)**

Master of Computer Applications (MCA) — Thiruvananthapuram, Kerala

Relevant Coursework: Data Structures, Web Technologies, Database Management, Software Engineering

Symbiosis Institute of Computer Studies and Research

Aug 2022 – Mar 2025

Bachelor of Computer Applications (BCA) — CGPA: 7.0

AWARDS & ACCOMPLISHMENTS

- Introduction to Ethical Hacking — Offenso Hackers Academy
- Cyber Security Certification — Acmegrade
- Full Stack Web Development Intern Certificate — Unified Mentor (Skills: HTML5, CSS, JavaScript)
- NPTEL Cloud Computing Certification — NPTEL · Issued Jan 2026
- Agentic AI Hackathon with IBM watsonx Orchestrate — LabLabAI · 2025 (Credential ID: cmit0exnh0009ej0sfy12oyr)
